

Communication 2024

Dear Parents and Caregivers

Communication between the school and home is very important to us so we have a simple system to communicate with you.

- **Audiri (formerly SkoolBag):** An important way to keep in touch with what is happening at Warners Bay Public School. We use this app as a way of communicating information such as notes about upcoming activities, reminders of events and due dates and as a way of providing instant information to families where a quick response or notification is required. Our newsletter is also sent out fortnightly on Audiri and can be viewed under the newsletter tab. Without this app you may miss vital information about activities or events happening in the school.

Need to send in an absence notices or update student details? You will find this within the app under the eForms tab. From there you will need to complete the appropriate fields and click submit.

We encourage families to download our Audiri app, available through the app store or play store, and have notifications enabled. If you already have the Audiri App, it's just a matter of clicking on the add / remove button on the home page, then searching for Warners Bay Public School, click on the + button to the right of the school name.

- **School Bytes:** This is the system we use for all student finance and permission notes within the school. Permission notes; fee reminders and Statements of Account will be emailed to parents using this system. Parents can register for the School Bytes Parent Portal which will enable them to see available credit and apply to fees, see all outstanding fees and pay online and sign permission notes. A School Bytes app is also now available making it even easier to keep up to date with notes and payments. Download via the app store.
- **Sentral Parent Portal:** Is used to contact your child's teacher or to view information about your child, including their semester reports. Please contact the school office for information on how to register your access.
- **Facebook:** Is used only for promotion. On Facebook you will see all of the wonderful things that are happening in the school.
- If you need to contact us, you can phone the school office or email the school.

I encourage all parents to contact the school if you have any questions or concerns.

We look forward to providing great communication channels with our school community and are excited about the opportunities available with our new app.

Kind regards

Deborah Hall
Principal
