

The Bee Hive Buzz

Editor Mr. Applebee

- Since 2017

Our Learning

Students in the Bee Hive have been busy this term. We have continued our learning on number and the 4 different operations. All students have enjoyed working together to experiment and investigate these operations. Students even got the opportunity to work on the floor with no tables or chairs as we eagerly awaited new furniture to arrive.

Science

In Science we have been investigating Day and Night. Students have learnt about the relationship between the Earth and the Sun. Students were given the task to create a poster with some facts and diagrams about the Earth and the Sun. Here are some of our posters.
