

Learning with **TEAM HORNE**

On the 5th of June, our class had some Year 12s visit us to help us create some slime. This was part of their Food and Hospitality subject and involved reaching out and teaching a skill to the community.

This is what students from our class thought of the activity...

On Wednesday, Jess and Kayla came to our school to help make slime. It was squishy, sticky and soft slime.

Phoebe

My favourite part was playing with the slime. It was really stretchy, gluey and sticky.

Arlo

On Wednesday we created some colourful slime. It was amazing!

Clancy

On Wednesday my class made soft, sticky slime. The slime was wet, soapy and felt disgusting. It was so disgusting but in a good way.

Tahlia

On Wednesday we made some soft slime. I loved it! We used shaving foam, glue colours and activators. Could we make it again Mr Horne?

Xanthe

We made slime and mine was green. I called it pickles. It was hard to make but it was a great activity.

Harlii

Jess and Kayla came to our class and made slime. We could decorate it with beads that looked like diamonds! It was so fun!

Liam

On Wednesday we made slime with Jess and Kayla. The amazing slime felt squishy and slimy. It was the most enjoyable thing. You could put whatever you wanted in!

Weston

It was so sticky that it stuck to my hands. My slime's colour was purple. You could rip the slime apart and put it back together. When I got home I got my slime and out played with it. I love to make slime!

Lottie

On Wednesday we made slime with two high school kids, Jess and Kayla. It was fun! I then gave Mr Horne my slime and then it suddenly got stuck on his hands. He said it was disgusting. It was funny!

Hannah

On Wednesday we made slime with two teenagers. I don't like slime but I like playdough. Slime gets everywhere!

Markus

The two Year 12s Jess and Kayla helped us make slime. I liked the slime but I got it on me. It was fun and I liked how it was stretchy. I would like to make it again.

Iliana

The slime was sticky, wet and stretchy. I was thankful that Jess and Kayla helped us make slime. We played with it and it was fun. The Year 12s said we could take the slime home too. I was really happy!

Nakiyah

The slime was so wet and sticky because of all the moisturiser. The slime was so fun, I was glad we got to decorate it.

Noah

On Wednesday we made slime! It was stretchy and gooey and we put little foam balls in it. Mine was green with glitter and foam balls.

Nahia

It was exciting when we made slime. It had shaving cream in it and it became sticky, squishy and stretchy.

Pippa

I really like the purple colour of my slime. I liked how we got to decorate the slime with foam balls and glitter. Some were sticky and wet, but some were stretchy and soft.

Sadie
