

ROOM 11 NEWS

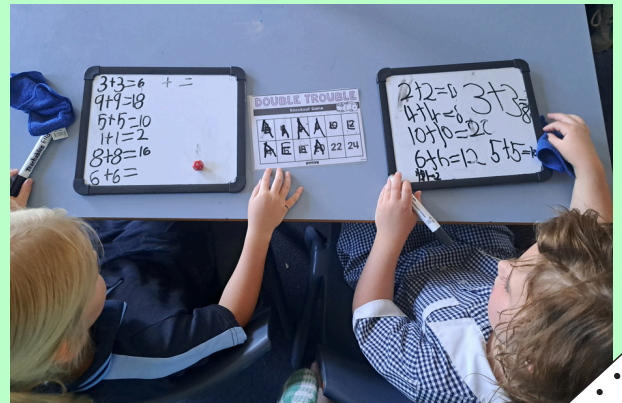

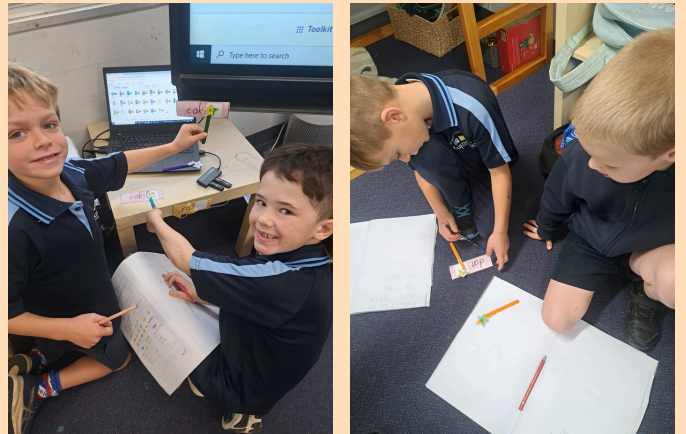

ENGLISH

We have been busy learning about the split vowel digraph (magic e or bossy e). Students particularly enjoyed using their magic e wands to work with a partner and change words into new words.

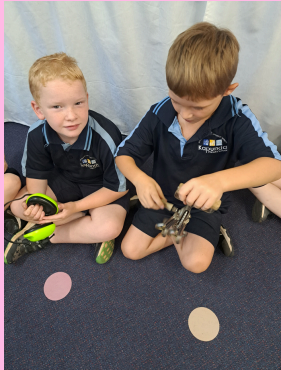

MATH

Students have been learning about fact families. They have been using fact families to solve simple addition and subtraction problems.

HASS

Our HASS focus has been on past and present. Students investigated items from the past. In groups they guessed what each item was and how it was used. The highlight for many students was the impromptu dance party that happened after they realised what a record player was and how it worked.

SCIENCE

The Solar System has been our focus in Science lessons.

Students created their own information posters about the Sun. They then worked in groups to research a planet and co-design an information poster which they shared at assembly.
